Left Stifle: Very small lucency on medial condyle. Really small - 2 mm deep by 5 mm long. This is fine long term. Should possibly reshoot in 6 to 8 weeks. Could start on chondroprotective agents (Reflex and/or Adequan) for the next 8 weeks. No surgery needed. I feel you fine if it stays like this.

Right Stifle: NSF*

* NSF= No significant radiographic findings.

Comments: Overall Okay
